BUNTS SANGHA'S

S.M.SHETTY COLLEGE OF SCIENCE, COMMERCE & MANAGEMENT STUDIES

REPORT

It was an extremely knowledgeable session wherein students gained knowledge on various practical aspects of banking. The Resource Person Mr. Kapil Jha Founder of Erudite Assets Limited, who has an experience of 14 years in banking sector, initially spoke on the basic concepts of banking and later he explained the modus operandi of cheques, credit cards, debit cards and the clearing houses.

On the fourth day another Resource Person Mr. Mohit Jain, Senior Vice President of YES Bank, explained the students about the scope of career in banking sector.

It was an interactive session between the resource person and the students.

Total 53 students from various courses like B.Com, B.Com (Banking and Insurance), B.com (Accounting and Finance), and Bachelor of Management Studies have been benefited from this workshop

BUNTS SANGHA'S

S.M.SHETTY COLLEGE OF SCIENCE, COMMERCE & MANAGEMENT STUDIES

DEPARTMENT OF ACCOUNTANCY AND FINANCIAL MANAGEMENT

REPORT

Name of the Program: Certificate Course on Financial Market

Duration: 31st August to 8th September 2017

Resource Person: Mr. Hemal Shah & Mr. Sharad Pachisiya

Course Fees: Rs. 1000 per student.

Highlights: Financial Market Workshop was organized by Department of Accountancy & Financial Management. It was for BAF, BBI and B.COM course for gaining extra knowledge and information of finance, share market, the stock exchange dealings etc. The Course was held for 6 days from 31st August to 8th September 2017 under the guidance of Prof. Hemal Shah, Trainer and Mr. Sharad Pachisiya, Vice President of Edelweiss.

Following topics were discussed:-

- a. Introduction to equity market
- b. Indices
- c. Primary Markets
- d. Secondary Markets
- e. Derivatives
- f. Pay Off's For Derivatives
- g. Market Participants
- h. Clearing and Settlement
- i. Introduction To Commodity Markets
- j. Introduction To Currency Markets

The Trainer has explained the career in share market and showed the live dealing in shares market with the help of his portfolio, which made students to understand the concept with the help of practical knowledge. On the last day of the lecture, exam was taken to analyze the performance of the students.

REPORT

ON

6-DAY FINANCIAL MARKET WORKSHOP

ORGANISED BY MANAGEMENT ASSOCIATION

The management association of Department of Management Studies organized a 6-Day Workshop on Financial Market for the students of second year of BMS (Finance). The students were taken through a well-structured syllabus with practical sessions. Students also learnt live trading during in stock exchange during the workshop.

The workshop was conducted by Mr. Hemal Shah (Sub-broker, BSE and director, Stockconcept). 22 students participated in the intensive workshop.

SYLLABUS OF MICROSOFT POWERPOINT

1 hours

Getting Started with Powerpoint

- Interface and Ribbons
- Orientation to Views
- Navigating Around the Presentation
- Using The File Tab
- File Operations

1 hours

>Starting New Presentation

>Saving Presentation

Working with Slides

- Inserting New Slides
- Changing and Resetting Slide Layouts
- Using Slide Sorter View
- Rearranging Slides
- Duplicating Slides

hour 1

Working with Text

- Entering Text
- Moving and Copying
- Formatting Text
- Changing Text Alignment
- Formatting Paragraph
- Working with Bullets and Numbering

hour 2

Inserting Illustrations

- Shapes
- > Lines and Shapes
- > Grouping, Ordering, Rotating, Aligning and Distributing
- Formatting Illustrations
- > Setting Shape Styles
- > Color, Gradient, Pattern and Textured Fills
- > Setting Translucent Fills
- > Applying Shape Effects

hour 2

- Working with Smart-Art

- Pictures and Clip Art

> Finding Clips

> Applying Picture Styles

> Adjusting Pictures

> Resize and Crop Pictures

- Text Boxes

- Working with Word-Art

- Creating Photo Album

- Formatting Slides

- > Applying Themes
- > Applying Colour, Gradients, Textures and Patterns Backgrounds
- > Using a Picture as a Background
- > Changing Slide Page Setup and Orientation

Charting

- > Inserting Charts
- > Chart Formatting

hour 2

Adding Animations

- > Setting and Using Slide Transitions
- > Controlling Bulleted List Animation
- > Custom Animations
- > Transitional and Event Sounds
- > Animating Charts
- > Setting and Using Timing

hour 1

Presenting

- > Using the Slide Show View
- > Setting Resolution
- > Slide Show Commands
- > Slide Show Tools
- > Slide Show Controls
- > Using Reading View
- > Using the Laser Pointer

hour 1

Printing and Output

- > Printing Slides
- > Printing Slides
- > Printing Handouts
- > Setting Colour Options
- > Printing Notes Pages and Tables

hour 1

Customising PowerPoint

- Customise Quick Access Toolbar
- Personalise the Interface
- Customise Save Options

hour 1

Editing Presentation Masters

- Creating a Custom Layout
- Setting Up Slide Masters
- > Formatting Slide & Title Master
- > Preserving Slide Master
- > Adding Header & Footer Information
- Inserting New Slide & Design Master
- Create Custom Themes
- Working with Notes Master
- Working with Handout Master

hour 1	Creating & Editing Business Diagrams
	- Creating a Table
	- Setting Table Options
	- Applying Table Styles
	- Entering Data in Table Cells
	- Adjusting Table Cells
	- Importing & Displaying Excel Data
hour 2	Working with Templates
	- Saving as Template
	- Applying a Custom Template
	Creating a Multimedia Enriched Presentation
	- Adding Special Effects
	- Applying Animation Scheme
	- Working with Animation Painter
	- Animating Text & Objects
	- Animating Chart
	- Inserting Sounds & Video
	- Controlling Media Items
	- Timeline Sequencing
	- Changing Multimedia Settings
	- Inserting Animated CLIP's
	Expanding a Slide Show
	- Creating a Custom Show
	- Setting Up the Slide Show
	- Slide Timings
	> Setting Automatic Slide Timings
	> Rehearsing Slide Transition Timings
	- Annotate Presentation
hour 1	Creating Web Presentation
	- Creating Web Presentation
	- Working with Hyperlinks
	- Using Action Button & Action Settings
	- Publish Presentation as Web Page
hour 1	Collaborating on a Presentation
	- Reviewing a Presentation
	- Working with Comments
	- Working with Slide Library
	Securing & Distributing a Presentation
	- Secure Presentations
	- Package a Presentation

POWAI

DEPARTMENT OF MANAGEMENT STUDIES 2017-18

REPORT ON

5-DAYS Microsoft Certification Course on Advanced Excel & Powerpoint

The department of Management Studies organized the 5-Days Microsoft Certification Course on Advanced Excel & Powerpoint from 11th March 2018 to 24th June 2018.

The workshop provided an insight on basics of Advanced Excel and Powerpoint. The students gained skills to prepare effective powerpoint presentations. They were also given insight on excel including formulas for various uses. A total of 37 students participated in the Certificate Course.

Course Incharge:-

Nidhi Chandorkar

PRINCIPAL

Dr. Liji Santosh
Vice-Principal

Dr. Sridhara Shetty
Principal

**CERTIFICATE COURSE
IN
CYBER SECURITY**

Bunts Sangha's
S.M. Shetty College Of Science, Commerce And Management Studies, Powai

THE DEPARTMENT OF INFORMATION TECHNOLOGY

Invites all the Students for

CERTIFICATE COURSE IN CYBER SECURITY

Aim: To make students aware about cyber laws and security.

Course begins on: 27th December 2017

Duration of Course: 30 hours

Fees: Rs. 2,820 per student

Venue: 8th Floor IT Lab

Students will be awarded with certificate on successful completion of the course.

BUNTS SANGHA'S

COURSE CONTENTS

Syllabus

ATS Network Security and Ethical Hacking

[1.]Hacking Psychology

The next section will explain the purpose of ethical hacking and exactly what ethical hackers do. As mentioned earlier, ethical hackers must always act in a professional manner to differentiate themselves from malicious hackers. Gaining the trust of the client and taking all precautions to do no harm to their systems during a pen test are critical to being a professional.

- (1.)Concept of Ethical Hacking: Legal or illegal??
- (2.)Categories of Hackers(As per Knowledge)
- (3.)Categories of Hackers(As per Working)
- (4.)How to secure yourself from Attackers
- (5.)How to Stop Attackers
- (6.)Indian Cyber Law

[2.]E-Mails: Exploitation and Security

Forging an e-mailheader to make it appear as if it came from somewhere or someone other than the actual source. The main protocol that is used when sending e-mail -- SMTP -- does not include a way to authenticate. There is an SMTP service extension (RFC 2554) that allows an SMTP client to negotiate a security level with a mail server. But if this precaution is not taken anyone with the know-how can connect to the server and use it to send spoofed messages by altering the header information.

- (1.)What is an E-mail
- (2.)Working of E-mail
- (3.)Traveling of an E-Mail
- (4.)Email Servers
- (5.)E-mail Forgery and Spamming
- (6.)Security to Anonymous Mailing
- (7.)Attacks on E-Mail Password
- (8.)Securing the E-Mail Passwords
- (9.)Email Forensics

Typical email security products didn't. Phishing emails that link to infected websites cause many of today's information security breaches. Yet typical email security products use outdated methods from phishing's early days, when hackers attached viruses to emails. They can't catch blended email/web threats that can lead to malware infection. And they can't detect employee activities that can lead to data loss.

[3.]Operating System Hacking & Security

Hacking systems and planting and or sending malicious content are the two most performed actions by hackers. As an ethical hacker, it will be your responsibility to test systems against hacking and to be prepared for the different types of malicious content that hackers will try to get

into your network environment. This course examines password cracking methodologies and tools, privilege escalation, rootkits, steganography and backdoor types and tools, and different types of viruses and worms and their countermeasures.

1. Introduction to System Software's
2. Windows Security Components and Working
3. Introduction to Virtual Machines
4. Implementation of Virtualization
5. Windows
6. Linux
7. Attacks on Windows Login Password
8. Other Security Measure
9. Windows Inbuilt Flaws and Security Loopholes
10. Invading into Computer System
11. Optimizing Windows Computer System
12. Restrict Hackers into box

A technical background with a solid understanding of networks and networking concepts, such as IP, IP Routing, and LAN Switching, as well as Windows and/or UNIX/LINUX operating systems.

[4.] *Malwares: Trojan, Viruses & Worms*

Malware, short for **malicious software**, is software used to disrupt computer operation, gather sensitive information, or gain access to private computer systems. It can appear in the form of code, scripts, active content, and other software. Malware² is a general term used to refer to a variety of forms of hostile or intrusive software.

Named after the Trojan Horse of ancient Greek history, a **Trojan** is a network software application designed to remain hidden on an installed computer. Trojans generally serve malicious purposes and are therefore a form of **Malware**, like viruses.

1. What are malwares?
2. Trojan
3. Trojan Attack Methods
4. Some Well Known Trojans
5. Detection of Trojan
6. Viruses
7. Working and Functionality of Viruses
8. Development
9. Development of Folder lockers
10. Registry tweaks and Tricks
11. Developing Professional Security too
12. Detection and Manual Removal

A **computer virus** is a type of malware that, when executed, replicates by inserting copies of itself (possibly modified) into other computer programs, data files, or the boot sector of the hard drive; when this replication succeeds, the affected areas are then said to be "infected".

A **computer worm** is a standalone malware computer program that replicates itself in order to spread to other computers. Often, it uses a computer network to spread itself, relying on security failures on the target computer to access it. Unlike a computer virus, it does not need to attach itself to an existing program. Worms almost always cause at least some harm to the

network, even if only by consuming bandwidth, whereas viruses almost always corrupt or modify files on a targeted computer.

[5.]Attacks Related to Network &Security(LAN/WLAN)

Network security consists of the provisions and policies adopted by a network administrator to prevent and monitor unauthorized access, misuse, modification, or denial of a computer network and network-accessible resources. Network security involves the authorization of access to data in a network, which is controlled by the network administrator. Users choose or are assigned an ID and password or other authenticating information that allows them access to information and programs within their authority.

- 1. Introduction to the LAN(Local Area Networks)**
- 2. Back-Track: Penetration Tool**
- 3. Secure Network Configuration**

Security management for networks is different for all kinds of situations. A home or small office may only require basic security while large businesses may require high-maintenance and advanced software and hardware to prevent malicious attacks from hacking and spamming.

[6.]Web Server Attacks & Security

The HTTP (or HTTPS) protocol is the standard that makes it possible to transfer web pages via a request and response system. Mainly used to transfer static web pages, the web has quickly become an interactive tool making it possible to provide on-line services. The term "web application" refers to any application whose interface can be accessed on the web from a simple browser. Now the basis for a certain number of technologies (SOAP, Javascript, XML-RPC, etc.), the HTTP protocol plays an undeniable strategic role in information system security.

- 1. Introduction to Web Application Security**
- 2. Understanding Attack Vectors**
- 3. Web Application Attacks**
- 4. SQL Injection**
- 5. Google Dorks – Using Google as an Expert**
- 6. Cross Site Scripting: XSS**
- 7. Directory Traversal Attacks**
- 8. Putting breaks on Web Application attacks**
- 9. Mozilla Firefox as a Hacking tool**
- 10. Bypassing Proxy – Intermediate**
- 11. Using Google as Proxy**
- 12. Remote File Inclusion for Opening Blocked Websites**
- 13. Creating your Own Proxy Server**

Attacks on web applications are always harmful since they give the company a bad image. A successful attack can have any of the following consequences:

- Website defacement;
- Stolen information;

- Modification of data, and particularly modification of users' personal data
- Web server intrusion.

[7.] *Software Reverse Engineering and Attacks on Demand*

Software Reverse Engineering (SRE) is the practice of analyzing a software system, either in whole or in part, to extract design and implementation information. A typical SRE scenario would involve a software module that has worked for years and carries several rules of a business in its lines of code. Unfortunately the source code of the application has been lost; what remains is "native" or "binary" code. Reverse engineering skills are also used to detect and neutralize viruses and malware, as well as to protect intellectual property. It became frighteningly apparent during the Y2K crisis that reverse engineering skills were not commonly held amongst programmers.

1. What is Reverse Engineering
2. Software – Definition
3. Disassembling the Software's
4. Software Cracking & Serial Key Phishing
5. Software Patching
6. Applying Application Security
7. Attacks on Demand

Since that time, much research has been undertaken to formalize just what types of activities fall into the category of reverse engineering so that these skills could be taught to computer programmers and testers. To help address the lack of software reverse engineering education, several peer-reviewed articles on software reverse engineering, re-engineering, reuse, maintenance, evolution, and security were gathered with the objective of developing relevant, practical exercises for instructional purposes. The research revealed that SRE is fairly well described and most of the related activities fall into one of two categories: software development-related and security-related.

S.M. SHETTY COLLEGE OF SCIENCE, COMMERCE & MANAGEMENT STUDIES

Microsoft Certification Training Programme Report

Objective: To make the students aware of the cyber security and the laws pertaining to it.

The B.Sc. IT Department & Placement Cell of S. M. Shetty College ha organized a certification programme in **Cyber Security** of Microsoft Certified Programmer which is conducted by Microsoft AER|ATS InfoTech Pvt. Ltd. for B. Sc. IT students.

The training programme was attended by 51 students and 3 Staff members. All the participated students were benefited with this programme as it helped them to get Microsoft Certificates after exam.

From Microsoft AER|ATS InfoTech Pvt. Ltd. Mr. Nishant Sharma (Sr. Subject Matter Expert) had given the training. The training was conducted for 3 days (from 27th December 2017 to 29th December 2017), every day for 8 hours.

Course Outcome:

After learning this course, students will be able to understand the basics of Cyber Security and understand the difference between ethical and non-ethical hacking and also help them to remember different terminologies associated with Cyber Security like Worms, Viruses, Spyware, etc.
