Microsoft Certification Course on Network Security - COURSE CONTENT

[1.]Hacking Psychology

The next section will explain the purpose of ethical hacking and exactly what ethical hackers do. As mentioned earlier, ethical hackers must always act in a professional manner to differentiate themselves from malicious hackers. Gaining the trust of the client and taking all precautions to do no harm to their systems during a pen test are critical to being a professional.

- (1.) Concept of Ethical Hacking: Legal or illegal??
- (2.) Categories of Hackers(As per Knowledge)
- (3.) Categories of Hackers(As per Working)
- (4.) How to secure yourself from Attackers
- (5.) How to Stop Attackers
- (6.) Indian Cyber Law

[2.]E-Mails: Exploitation and Security

Forging an e-mailheader to make it appear as if it came from somewhere or someone other than the actual source. The main protocol that is used when sending e-mail -- SMTP -- does not include a way to authenticate. There is an SMTP service extension (RFC 2554) that allows an SMTP client to negotiate a security level with a mail server. But if this precaution is not taken anyone with the know-how can connect to the server and use it to send spoofed messages by altering the header information.

- (1.) What is an E-mail
- (2.) Working of E-mail
- (3.) Traveling of an E-Mail
- (4.) Email Servers
- (5.) E-mail Forgery and Spamming
- (6.) Security to Anonymous Mailing
- (7.) Attacks on E-Mail Password
- (8.) Securing the E-Mail Passwords
- (9.) Email Forensics

Typical email security products didn't. Phishing emails that link to infected websites cause many of today's information security breaches. Yet typical email security products use outdated methods from phishing's early days, when hackers attached viruses to emails. They can't catch blended email/web threats that can lead to malware infection. And they can't detect employee activities that can lead to data loss.

[3.] *Operating System Hacking & Security*

Hacking systems and planting and or sending malicious content are the two most performed actions by hackers. As an ethical hacker, it will be your responsibility to test systems against hacking and to be prepared for the different types of malicious content that hackers will try to get into your network environment. This course examines password cracking methodologies and tools, privilege escalation, rootkits, steganography and backdoor types and tools, and different types of viruses and worms and their countermeasures.

1. Introduction to System Software's
2. Windows Security Components and Working
3. Introduction to Virtual Machines
4. Implementation of Virtualization
5. Windows
6. Linux
7. Attacks on Windows Login Password
8. Other Security Measure
9. Windows Inbuilt Flaws and Security Loopholes
10. Invading into Computer System
11. Optimizing Windows Computer System
12. Restrict Hackers into box

A technical background with a solid understanding of networks and networking concepts, such as IP, IP Routing, and LAN Switching, as well as Windows and/or UNIX/LINUX operating systems.

[4.] *Malwares: Trojan, Viruses & Worms*

Malware, short for **malicious software**, is software used to disrupt computer operation, gather sensitive information, or gain access to private computer systems. It can appear in the form of code, scripts, active content, and other software. 'Malware' is a general term used to refer to a variety of forms of hostile or intrusive software.

Named after the Trojan Horse of ancient Greek history, a **Trojan** is a network software application designed to remain hidden on an installed computer. Trojans generally serve malicious purposes and are therefore a form of **Malware**, like viruses.

1. What are malwares?
2. Trojan
3. Trojan Attack Methods
4. Some Well Known Trojans
5. Detection of Trojan
6. Viruses
7. Working and Functionality of Viruses
8. Development
9. Development of Folder lockers
10. Registry tweaks and Tricks
11. Developing Professional Security too
12. Detection and Manual Removal

A **computer virus** is a type of malware that, when executed, replicates by inserting copies of itself (possibly modified) into other computer programs, data files, or the boot sector of the hard drive; when this replication succeeds, the affected areas are then said to be "infected".

A **computer worm** is a standalone malware computer program that replicates itself in order to spread to other computers. Often, it uses a computer network to spread itself, relying on security failures on the target computer to access it. Unlike a computer virus, it does not need to attach itself to an existing program. Worms almost always cause at least some harm to the network, even if only by consuming bandwidth, whereas viruses almost always corrupt or modify files on a targeted computer.

[5.] Attacks Related to Network & Security (LAN/WLAN)

Network security consists of the provisions and policies adopted by a network administrator to prevent and monitor unauthorized access, misuse, modification, or denial of a computer network and network-accessible resources. Network security involves the authorization of access to data in a network, which is controlled by the network administrator. Users choose or are assigned an ID and password or other authenticating information that allows them access to information and programs within their authority.

- 1. Introduction to the LAN (Local Area Networks)**
- 2. Back-Track: Penetration Tool**
- 3. Secure Network Configuration**

Security management for networks is different for all kinds of situations. A home or small office may only require basic security while large businesses may require high-maintenance and advanced software and hardware to prevent malicious attacks from hacking and spamming.

ATS—Learning Solutions

[6.] Web Server Attacks & Security

The HTTP (or HTTPS) protocol is the standard that makes it possible to transfer web pages via a request and response system. Mainly used to transfer static web pages, the web has quickly become an interactive tool making it possible to provide on-line services. The term "web application" refers to any application whose interface can be accessed on the web from a simple browser. Now the basis for a certain number of technologies (SOAP, Javascript, XML-RPC, etc.), the HTTP protocol plays an undeniable strategic role in information system security.

- 1. Introduction to Web Application Security**
- 2. Understanding Attack Vectors**
- 3. Web Application Attacks**
- 4. SQL Injection**
- 5. Google Dorks – Using Google as an Expert**
- 6. Cross Site Scripting: XSS**
- 7. Directory Traversal Attacks**
- 8. Putting breaks on Web Application attacks**

9. Mozilla Firefox as a Hacking tool
10. Bypassing Proxy – Intermediate
11. Using Google as Proxy
12. Remote File Inclusion for Opening Blocked Websites
13. Creating your Own Proxy Server

Attacks on web applications are always harmful since they give the company a bad image. A successful attack can have any of the following consequences:

- Website defacement;
- Stolen information;
- Modification of data, and particularly modification of users' personal data
- Web server intrusion.

[7.] Software Reverse Engineering and Attacks on Demand

Software Reverse Engineering (SRE) is the practice of analyzing a software system, either in whole or in part, to extract design and implementation information. A typical SRE scenario would involve a software module that has worked for years and carries several rules of a business in its lines of code. Unfortunately the source code of the application has been lost; what remains is “native” or “binary” code. Reverse engineering skills are also used to detect and neutralize viruses and malware, as well as to protect intellectual property. It became frighteningly apparent during the Y2K crisis that reverse engineering skills were not commonly held amongst programmers.

1. What is Reverse Engineering
2. Software – Definition
3. Disassembling the Software's
4. Software Cracking & Serial Key Phishing
5. Software Patching
6. Applying Application Security
7. Attacks on Demand

Since that time, much research has been undertaken to formalize just what types of activities fall into the category of reverse engineering so that these skills could be taught to computer programmers and testers. To help address the lack of software reverse engineering education, several peer-reviewed articles on software reverse engineering, re-engineering, reuse, maintenance, evolution, and security were gathered with the objective of developing relevant, practical exercises for instructional purposes. The research revealed that SRE is fairly well described and most of the related activities fall into one of two categories: software development-related and security-related.

The screenshot displays a Windows desktop environment. At the top, a video player interface is visible, showing two open windows. The upper window is an Excel spreadsheet titled "Advanced Excel Worksh...mp4", which contains a table with columns labeled A through L. The first column (A) lists names, and the second column (B) lists IDs. The names listed are: vandana, raj, kamal, sonal, pooja, kanti, ram, nishi, priyam, doli, chaital, prateek, kamal, maryam, neha, shwini, kusum, and muskan. The lower window is a presentation slide titled "Advanced Excel Worksh...mp4", featuring a 3x3 grid of colored circles with letters: MS (blue), NS (purple), HM (yellow), 3K (green), PT (pink), RK (orange), DM (light green), OB (light pink), and V (light blue). The Windows taskbar at the bottom includes the Start button, a search bar, and several pinned application icons. The system tray on the right shows the date and time as 21:02 on 15-04-2022.

During the conduct of the session, the content will be adjusted to ensure that students learn the necessary skills. The table contains more than 30 hours of total teaching / learning, which may vary depending on the progress made by the students. Generally, the entire course is held over 2 weeks, Monday to Friday, daily, 2 hours each day.

The fees for the students will be Rs.1800/-. We have a revenue model (75:25) where 25% of the revenue will be shared with your institution. This could be done in the following ways:

1. Your college / institute collects the fees and pays us 75% of the fees.
 2. Altercast LLP collects fees and pays your college by online mode or by kind up to 25% value of the total fees collected.
- We will be hosting a registration page / form on our website for student / faculty registrations. This page is updated dynamically, and the link will be shared with you to enable you to keep a track of registrations.
 - The course is conducted over the Google Meet platform, and daily attendance will be shared with you.
 - The payment for conducting the course may be paid in advance by online transfer. We will share our bank details with you.

A Certificate of Completion will be given to students who complete the course by Altercast LLP. This can also be a joint certificate.

***Altercast LLP** is registered with the Ministry of Corporate Affairs for conducting online courses and workshops. Altercast is also a registered MSME with Udyam Certificate. We have already conducted a 2 credit, 30 hours Filmmaking Course for your College. We are also designing more courses in media and communication and shall inform you about the same when the course structures are ready. The Founder, Dr. Mangesh Karandikar has over 30 years of experience in the field, with 15 years in the business of media production, followed by 15 years in media education.*

We hope to be associated with you for imparting media skills to your students. Kindly contact me in case you require any clarification.

Thank you,

Yours sincerely,

Report

The Department of Mass Media and Communication Skills of Bunts Sangha's S.M Shetty College of Science Commerce and Management conducted a 'Filmmaking Workshop' from September 13 to September 24, 2021. Prof. Mangesh Karandikar, Director of the MET Institute, served as the workshop's mentor. The thirty hours lectures were held at the Zoom Meeting with two hours of class daily. There were 20 students in the workshop. The main goal of the workshop was for students to learn about the basics of film making at home with the help of a mobile phone. The topics for the workshop were focused on various camera angles, lighting, phone video editing and audio editing.

During the workshop many advertisements, movies and videos were shared to help students with extensive study about the aspects of filmmaking like camera angles, lighting, and shots. A series of activities were done like story writing, script writing, storyboarding and video editing. The mobile video editing application used for the workshop was KineMaster. KineMaster is an accessible application that provides cuts and zooms, transitions, music, adding text in the videos, removing greenscreen from videos and adding a different background.

A detailed study of a script provided by Prof. Mangesh Karandikar called "The Godfather " and a report on the script was also done as one of the activities. Audio editing like removing of noise, volumes and waves of sounds were taught on an application called Audacity. By the end of ten days, students had learned to film videos and edit films just by using their phones and with simple and free applications. The last task given was to create a short film using all the techniques taught. It was a beneficial workshop which will help students for their future endeavours.

13.3.2 Types of Tables

Tables may broadly be classified into following two categories:

1. Simple and Complex Tables
2. General Purpose and Special Purpose Tables

1. Simple and Complex Tables

The simple and complex tables can be differentiated on the basis of number of characteristics presented and included. If the data based on one characteristic is presented, the table is known as simple table. The simple table is also known as one way table. On the other hand, as a complex table, two or more characteristics are presented. The complex tables are frequently used as they facilitate to incorporate full information and a proper consultation of all related facts. If the data are tabulated on the basis of only two characteristics then the table is known as two way table. If there

Inclusive Method

Under the inclusive method of classification both lower class limit as well as the upper limit of a class is included in that class itself. Following frequency distribution is formed using inclusive method for the data of Example 3 given above.

Table 13.7: Frequency Distribution of 24 Students by Inclusive Method

Class	Tally bar	No. of Students
0-9		1
10-19		4
20-29		6
30-39		9
40-49		4
Total		24

That means if data are classified in such a way that the lower as well as the upper class limits are included in the same class interval, it is called inclusive class interval.

COURSE CONTENTS

Certificate Course in Behavioural Economics
February 2022

Course Overview

This course seeks to provide an introduction to Behavioural Economics at the undergraduate level. It will draw on foundational theories related to behavioural economics and place them in the context of traditional economic theory that makes the assumptions of homoeconomicus (i.e., rational, self-interested, utility-maximizing individual). The course will first establish fundamental principles in behavioural economics and then explore the methods through which behavioural economics is applied in research, typically via experiments and randomized controlled trials. The final unit will inculcate thinking in behavioural economics by showing its many applications to public policy, businesses, and civil society.

Program Objectives

- 1) Understanding the theoretical and empirical underpinnings of Behavioral Economics
- 2) Learning how we can meaningfully predict and influence Human Behaviour 'for good'
- 3) Critically examining applications and case studies from real-world policy settings
- 4) Developing a methodology, mindset, and framework to design and implement behavioural change techniques to policy problems

Learning Outcome

- An understanding of the theoretical and empirical underpinnings of Behavioural Economics
- Learned how we can meaningfully predict and influence human behaviour 'for good'
- Critically examined applications and case studies from real world policy settings
- Developed a methodology, mindset, and framework to design and implement behavioural change techniques to policy problems

Report

Economists typically assume people behave in a rational and self-interested way, making standard models limited in their explanatory power. Psychological and sociological factors – though usually ignored in economic models – affect decision-making. The efforts taken by Department of Economics is to better behavioural understanding could subsequently aid development efforts.

Department of Economics have organised 31 hours certificate course in Behavioural Economics and 47 students registered for the same. The course was conducted on online platform zoom during the evening hours from 15th February, 2022 to 27th February 2022. Dr. Anirudh Tagat from Monk Prayogshala was invited as Consultant Advisor for the same. Along with faculty members Dr. Liji Santosh and Ms. Adya Bharati Dr. Tagat also took sessions for the students. In order to test what they learned in the classroom a field visit was organised to Sula Wines, Nashik. The learning outcome from the course were:

- An understanding of the theoretical and empirical underpinnings of Behavioural Economics
- Learned how we can meaningfully predict and influence human behaviour 'for good'
- Critically examined applications and case studies from real world policy settings
- Developed a methodology, mind-set, and framework to design and implement behavioural change techniques to policy problems.

The department thank all those who encouraged us to conduct the course in a college where commerce education prevails.

Gender

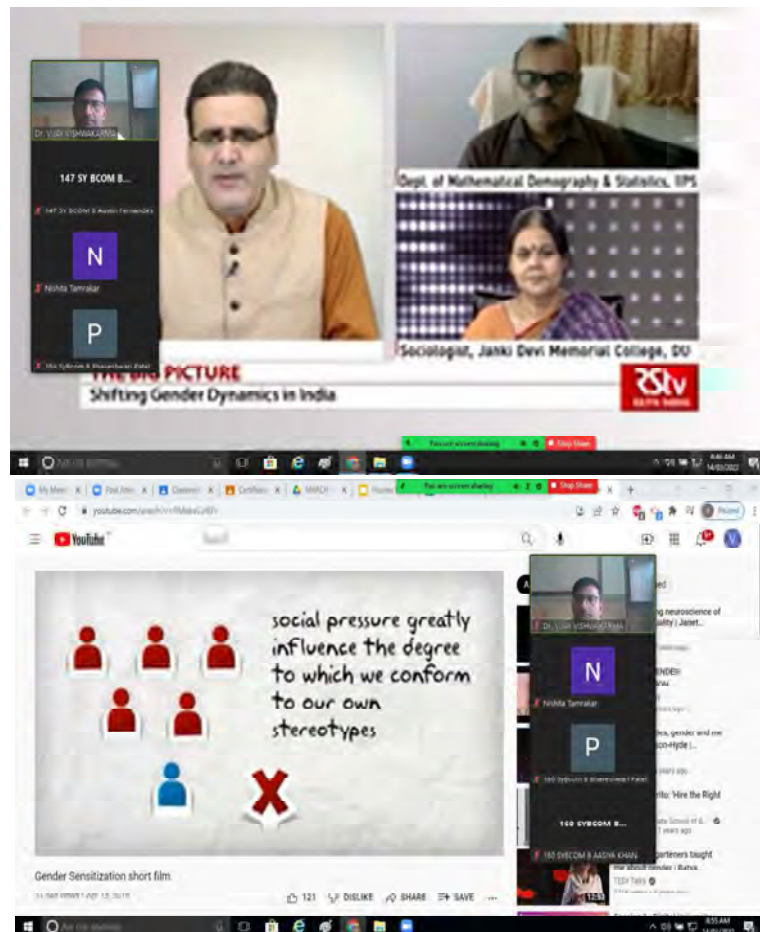

- What exactly is Gender? Why is it significant? How does it come into play?
- WHO defines Gender as socially constructed roles, behaviors, activities, and attributes that a given society considers appropriate for men and women.
- Example of a child can be taken to determine gender as a societal construct different from sex which is more of physiological concept.
- Gender is understood through patriarchy.
- Child associated with certain way of behaviour ,mannerism depending upon whether the child is a girl or a boy.
- This categorizes them into being masculine and feminine i.e a boy is considered masculine as he is tough ,aggressive, loud and girl feminine if she is soft ,gentle, calm ,emotional.

4. Law of Growth:

- This law State that "Wherever you go, there you are". For us to Grow is we who must change – and not the people, places or things around
- The only given we have in our lives is OURSELVES and that is the on have control over. When we change who and what we are within ou life follows it and changes too.

REPORT

Event: Certificate Course

Topic: 'Human Values & Ethics

Venue: Zoom App

Scope: Students across all Streams

Resource Person:

Objective: To facilitate all round development of Students by teaching them various concepts on Human Ethics, Ethos, Value System, etc.

Highlights- The IQAC organized a 30 hours Certificate Course on 'Human Values and Ethics.' The Resource persons conducted sessions on various topics like Law of Karma, Corporate Karma, Nishkama Karma, Personal and Professional Ethics, etc. The aim of the course was to facilitate all round development of the students and thereby improve the personality of the students by inculcating various ethical principles to them. The course saw very good participation from the students throughout all the sessions. The Resource persons also shared the E-content with the students on completion of the course. Students were highly satisfied with the course curriculum, course structure and course delivery by Resource Persons. It was decided that the course will be continued in future also. Total 1164 students enrolled in this course and benefited out of it.

Report

Resonant- The Language and Magazine Club of S.M. Shetty College of Science, Commerce & Management Studies, have started a Certificate Course on Marathi Language. An inauguration function was held on 18th December 2021. The function was attended by Principal Dr.Sridhara Shetty, along with Vice -Principal Dr. Liji Santosh, Vice Principal Assistant Professor Sandesha Shetty on Saturday 18th December 2021. The event marked a new beginning as students, staff and their family members are provided with a golden opportunity to learn Marathi language online. Knowledge of a State language will give the beneficiaries an edge over other applicants in fields of further education, research, career options and social life. It will also serve to broaden their world view on the much- respected Marathi culture. Further, this course has been developed in parallel to professional bodies in the field of Marathi Certificate courses. In this way, it ensures the continuing professional relevance of this certificate course. Duration of this course will be 30 hours and will provide students with scientific as well as practical approaches towards the language and the dialect. This course is open for all the stakeholders of Bunts Sangha trust across the institutions. "When we learn the language we learn the culture, we learn a different approach to our surroundings' ' Dr.Sridhara Shetty expressed his views during the inaugural speech. Dr.Sridhara Shetty facilitated our resource person Ms. Archana Poojary with blessings and best wishes for the course. Assistant Prof. Mahesh Savale introduced the course and other details to the Guests and dignitaries along with the Faculty members and students. This event concluded by the Vote of thanks by Assistant Prof. Neena Sharma, Incharge of Resonant - The Language and Magazine Club.
