REPORT

Empowerment & Enablement through Digital Tools- Creating Google Forms.

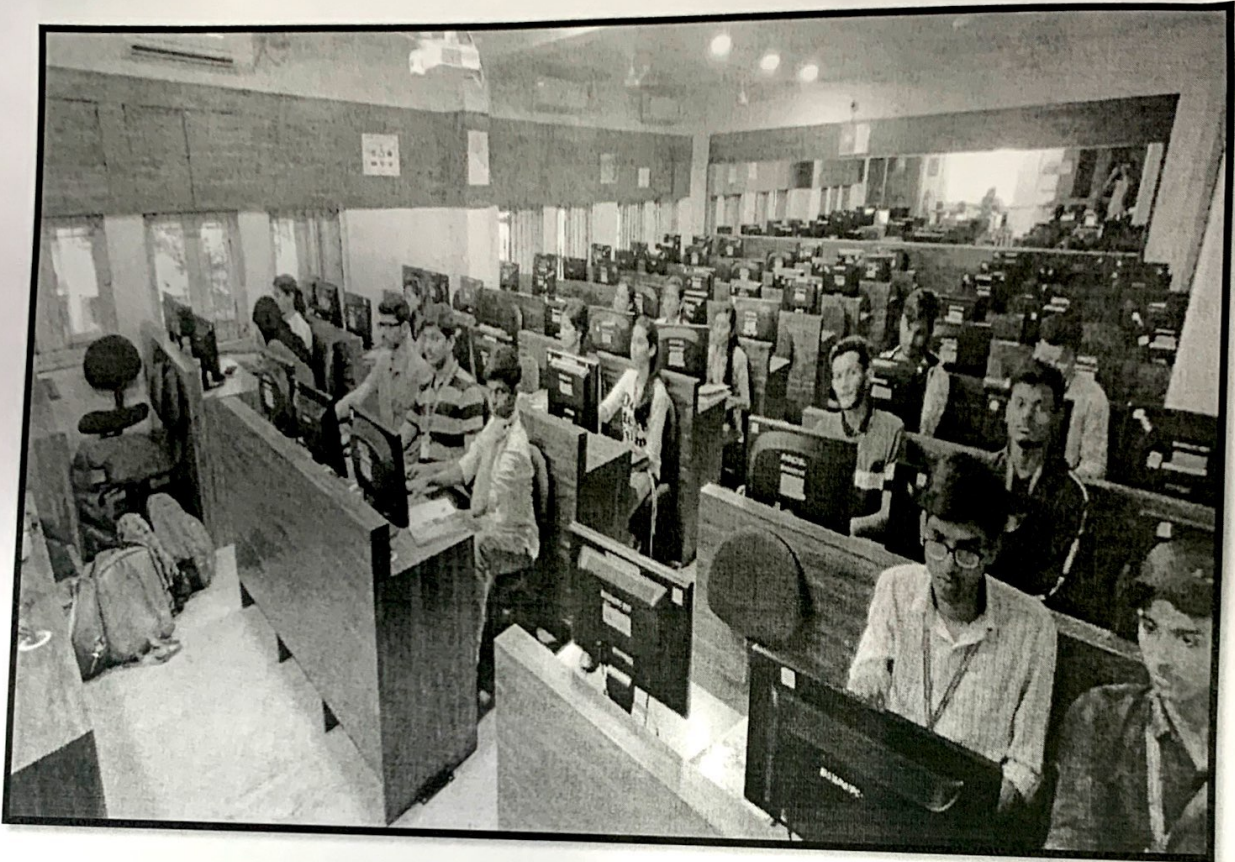

On Thursday, 5th Feb 2020 we had an interactive session Creating Google Forms.

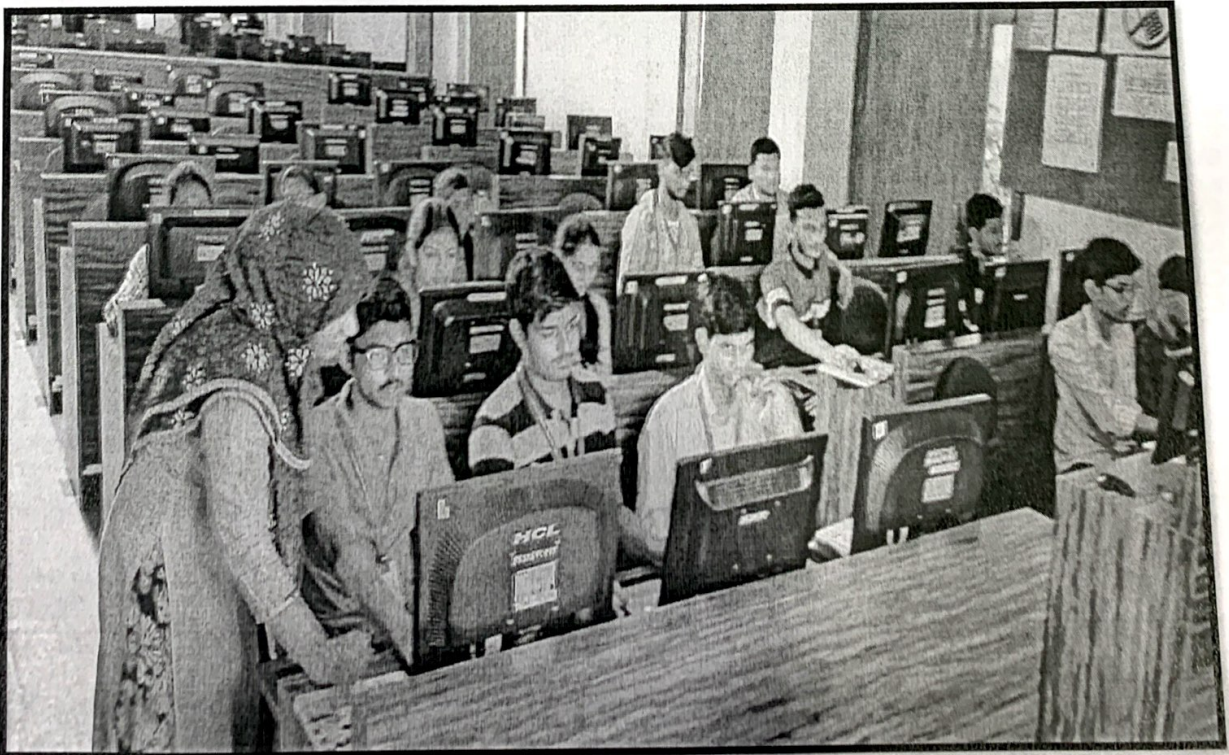

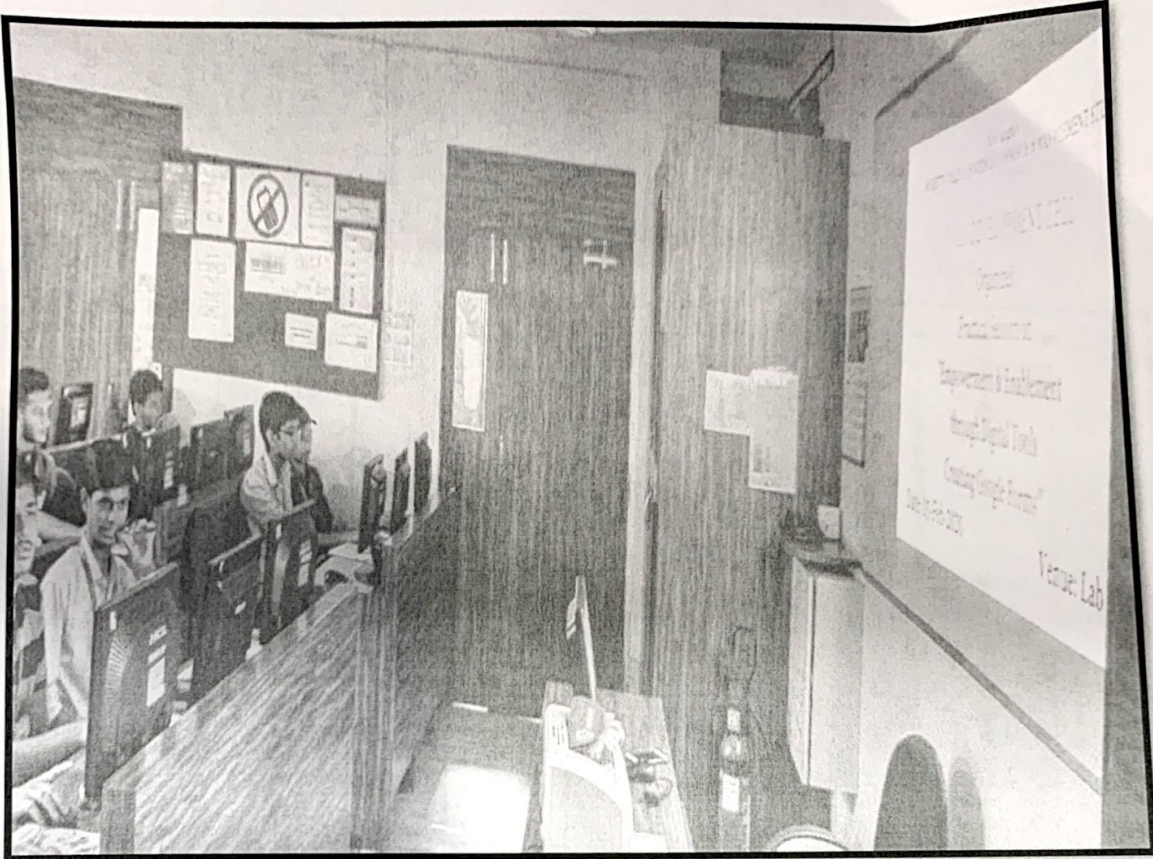

What are Google Forms?

Google Forms is a web-based app used to create forms for data collection purposes. Data gathered using the form is typically stored in a spreadsheet. Although there are other online survey apps, Google Forms is an excellent free option. Create polls, surveys, quizzes, and event registration sheets using Google Forms.

Asst. Prof: Nabila Kazi conducted the session for students, total 34 students attended this session. During the session the students created registration forms. The session was excellent in terms of information gained as well as interaction among students. Further it was concluded, that the students should take interest in attending such enlightening session and also inculcate such concept into their projects in order to grow educationally as well as professionally. Overall it was a successful event.
